Note 2 - Summary of significant accounting policies

2.1 Basis of preparation

The annual accounts have been prepared in accordance with Luxembourg legal and regulatory requirements on a going concern basis. Accounting policies and valuation rules are, besides the ones laid down by the Law, determined and applied by the Board of Directors.

The preparation of the annual accounts requires the use of certain critical accounting estimates. It also requires the board of managers to exercise their judgement in the process of applying the accounting policies. Changes in assumptions may have a significant impact on the annual accounts in the period in which the the assumptions changed. Management believes that the underlying assumptions are appropriate and that the annual accounts therefore present the financial position and results fairly.

The Company makes estimates and assumptions that affect the reported amounts of assets and liabilities in the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Covid-19

On March 11, 2020, the World Health Organisation declared the Coronavirus (COVID-19) in the category of a pandemic. The spread of COVID-19 has severely impacted many local economies around the globe. In many countries, businesses are being forced to cease or limit operations for long or indefinite periods of time. Measures taken to contain the spread of the virus, including quarantines, social distancing, and closures of non-essential services have triggered significant disruptions to businesses worldwide.

The Management has considered the impact of the COVID-19 on the going concern assumption of the Company. In light of this, the Management has concluded that the impact of the Coronavirus does not represent a material uncertainty in relation to the Company's ability to continue as going concerns through the date of the issuance of these financial statements.

2.2 Significant accounting policies

The main valuation rules applied by the Company are the following:

2.2.1 Financial assets

Valuation at purchase price

Other loans are valued at purchase price/nominal value (loans and claims), including the expenses incidental thereto. In case of a durable depreciation in value according to the opinion of the Board of Managers, value adjustments are made in respect of financial assets, so that they are valued at the lower figure to be attributed to them at the balance sheet date. These value adjustments are not continued if the reasons for which the value adjustment was made have ceased to apply.

2.2.2 Debtors

Debtors are valued at their nominal value. They are subject to value adjustments where their recovery is compromised. These value adjustments are not continued if the reasons for which the value adjustments were made have ceased to apply.

2.2.3 Prepayment

This asset item includes expenditures incurred during the financial year but relating to a subsequent financial year.

2.2.4 Provisions

Provisions are intended to cover losses or debts, the nature of which is clearly defined and which, at the date of the balance sheet, are either likely to be incurred or certain to be incurred but uncertain as to their amount or as to the date on which they will arise.

Provisions may also be created to cover charges which originate in the financial year under review or in a previous financial year, the nature of which is clearly defined and which at the date of the balance sheet are either likely to be incurred or certain to be incurred but uncertain as to their amount or the date on which they will arise.

Note 2 – Summary of significant accounting policies (continued)

2.2.5 Provision for taxation

Provisions for taxation corresponding to the difference between the tax liability estimated by the Company and the advance payments for the financial years for which the tax returns has not yet been filed are recorded under the caption "Tax debts".

2.2.6 Foreign currency translation

The Company maintains its books and records in EUR.

Transactions expressed in currencies other than EUR are translated into EUR at the exchange rate effective at the time of the transaction.

2.2.8 Creditors

Creditors are recorded at their reimbursement value. Where the amount repayable on account is greater than the amount received, the difference is shown as an asset and is written off over the period of the debt on a linear method.

2.2.9 Interest receivable and payable

Interest receivable and payable are recorded on an accrual basis.

Note 23 - Subsequent events

The ongoing military operation in Ukraine and the related sanctions targeted against the Russian Federation may have impact on the European economies and globally. The Company does not have any significant direct exposure to Ukraine, Russia or Belarus. However, the impact on the general economic situation may require revisions of certain assumptions and estimates. This may lead to material adjustments to the carrying value of certain assets and liabilities including within the next financial year. At this stage management is not able to reliably estimate the impact as events are unfolding day-by-day. The longer-term impact may also affect cash flows. Nevertheless, at the date of these financial statements the Company continues to meet its obligations as they fall due and therefore continues to apply the going concern basis of preparation. In the opinion of the Board of Directors, no other matters or events have occurred subsequent to 31 December 2021 which could materially affect the Annual Accounts and related disclosures for the year ended 31 December 2021.

No matters or circumstances have occurred subsequent to 31 December 2021 other than the above which would materially affect the annual accounts and related disclosures for the year then ended.
