# 1. INTRODUCTION

The GTC Hungary Real Estate Development Pltd. was registered in Budapest in September 1998. The company is part of the GTC Group, an experienced, established, and fully integrated, real estate group of companies operating in the CEE and SEE region with a primary focus on Poland and Budapest and capital cities in the SEE region including Bucharest, Belgrade, Zagreb and Sofia, where it directly acquires, develops and manages primarily high-quality office and retail real estate assets in prime locations. The GTC Group was established in 1994.

The GTC's headquarters are located in Hungary Budapest, at 22 Népfürdő street.

## PRESENTATION OF FINANCIAL INFORMATION

Unless indicated otherwise, the financial information presented in this Report was prepared according to International Financial Reporting Standards ("IFRS") as approved for use in the European Union.

All the financial data in this Report is presented in EUR or HUF and expressed in thousand unless indicated otherwise.

Certain financial information in this Report was adjusted by rounding. As a result, certain numerical figures shown as totals in this Report may not be exact arithmetic aggregations of the figures that precede them.

## PRESENTATION OF PROPERTY INFORMATION

Information on properties is presented pro-rata to the Group's consolidation method in each of the properties. The properties' valuation is based on the value that the Group consolidates in its consolidated financial statements. The occupancy rate given for each of the markets is as of 30 June 2025.

## FORWARD-LOOKING STATEMENTS

This Report contains forward-looking statements relating to future expectations regarding the Group's business, financial condition, and results of operations. You can find these statements by looking for words such as "may", "will", "expect", "anticipate", "believe", "estimate", and similar words used in this Report. By their nature, forward-looking statements are subject to numerous assumptions, risks, and uncertainties. Accordingly, actual results may differ materially from those expressed or implied by forward-looking statements. The Group cautions you not to place undue reliance on such statements, which speak only as of this Report's date.

The cautionary statements set out above should be considered in connection with any subsequent written or oral forward-looking statements that the Group or persons acting on its behalf may issue. The Group does not undertake any obligation to review or confirm analysts' expectations or estimates or to release publicly any revisions to any forward-looking statements to reflect events or circumstances after the date of this Report.

The Group discloses essential risk factors that could cause its actual results to differ materially from its expectations under Item 3. "Key risk factors", Item 5. "Operating and financial review", and elsewhere in

this Report. These cautionary statements qualify all forward-looking statements attributable to us or persons acting on behalf of the Group. When the Group indicates that an event, condition, or circumstance could or would have an adverse effect on the Group, it means to include effects upon its business, financial situation, and results of operations.

## 2. SELECTED FINANCIAL DATA

The following tables present the Group's selected historical financial data for the six-month period ended 30 June 2024 and 2025. The historical financial data should be read in conjunction with Item 5. "Operating and financial review" and the unaudited consolidated financial statements for the six-month period ended 30 June 2025 (including the notes thereto). The Group has derived the financial data presented in accordance with IFRS from the unaudited consolidated financial statements for the six-month period ended 30 June 2025.

### 3. KEY RISK FACTORS

#### RISK FACTORS RELATED TO THE GROUP'S BUSINESS

Risk	Description	Risk management method
<b>Risk of unfavourable macroeconomic trends</b>	The Group is affected by macroeconomic conditions, especially the overall conditions in the EU and national and local economies, such as growth in gross domestic product, inflation, changes in interest rates, and unemployment rates. Unfavourable macroeconomic trends combined with the instability of the financial markets may have a negative impact on the Group's operations, rental income, the market value of the Group's properties, as well as the availability and cost of debt financing/refinancing.	<ul style="list-style-type: none"> <li>▪ Ongoing monitoring of the market and macroeconomic conditions;</li> <li>▪ securing of rental income through the execution of long-term lease agreements with indexed rent rates;</li> <li>▪ ongoing analysis of the behaviour and needs of the tenants;</li> <li>▪ making decisions on new projects based on current and estimated market conditions; and</li> <li>▪ efforts to maintain a sufficient level of cash and available credit limits.</li> </ul>
<b>Geopolitical risk</b>	Geopolitical factors, including the approaching elections and challenging economic conditions in Hungary (further affected by reduced disbursements of EU funds), the political and economic environment in Serbia, political tensions in Poland between the Prime Minister and the President combined with substantial	<ul style="list-style-type: none"> <li>▪ Ongoing monitoring of the geopolitical situation in terms of its potential impact on the Group, individual projects and the Group's long-term investment plans;</li> <li>▪ as at the date of this Report, the Group has not identified specific</li> </ul>

	<p>defence-related fiscal expenditures, and the ongoing recession in Germany, may create significant uncertainties for the Group's activities. In addition, global developments such as the war in Ukraine, economic sanctions imposed on Russia and Belarus, the conflict in the Middle East, tensions between China and Taiwan, and uncertainties surrounding US foreign policy in light of the recent political transition remain relevant risk factors for the region. Taken together with other macroeconomic and geopolitical factors, these developments may negatively affect the Group's operations and financial results. The continuation of existing conflicts may lead to further disruptions in supply chains, reduced availability of subcontractors, and a general increase in the cost of materials and energy.</p>	<p>risks, which result directly from existing conflicts, which may have impacted the Group's operations, financial results or development process.</p>
<p><b>Risks related to the implementation of strategy</b></p>	<p>The Group may be unable to implement its strategy in part or in full and there can be no assurance that the implementation of the Group's strategy would achieve its goals. The success of the Group's strategy relies, in part, on various assumptions and contingencies (e.g. with respect to the level of profitability of any acquisition targets, investment criteria that have been developed by the Group, and the valuation of a project) that may prove to be partially or wholly incorrect or inaccurate resulting in a lower than expected return on investment. There is a risk that the Group will not be able to carry out its planned sale strategy in its entirety or in part or at the assumed prices (which may differ from the acquisition value) or, with respect to certain projects, cooperation of the majority partner in joint venture projects may be required.</p> <p>There is a risk that the Group will not be able to identify and secure new investments at attractive prices and on favourable terms and conditions that will satisfy its rate of return objectives and realise their values. Consequently, the Group may not be able to acquire properties and develop planned projects, and acquisitions may not actually</p>	<ul style="list-style-type: none"> <li>▪ Experienced, goal-oriented management for the Group;</li> <li>▪ qualified team of specialists;</li> <li>▪ monitoring market conditions (both global and regional) and other factors that are relevant for the achievement of the strategic goals of the Group;</li> <li>▪ periodic verification of key strategic goals; and</li> <li>▪ cooperating with renowned brokers and agents as well as reputable legal, tax, commercial and technical advisors in the due diligence process and in the process of new investment acquisitions.</li> </ul>

generate the expected income. The Group may also fail to achieve its goals due to internal and external factors of a regulatory, legal, financial, social or operational nature, some of which may be beyond the Group's control, such as volatile market conditions, a lack of capital resources needed for expansion and the changing price and availability of investment targets in the relevant markets, as well as changes to laws.

---

**Risk related to investments in new sectors and new markets**

The Group decided to pursue potential new investments in certain new sectors and geographical regions, including in: (i) innovation and technology parks; (ii) renewable energy facilities; and (iii) broad living sector, covering PRS, senior living and student housing properties. No assurance can be given that its investments in such new sectors may achieve the expected returns and increase the Group's profitability. The success of investments in new sectors and in new markets depends, to a significant extent, on possessing good knowledge of a given market and/or sector and an ability to locate and acquire properties at attractive prices and on favourable terms and conditions, and more experienced commercial real estate developers that have operated in such sectors for longer periods may have an advantage over the Group and constitute significant competition for the Group. Moreover, the successful implementation of the Group's new strategy may result in certain changes to the Group's property portfolio, including its geographic composition and composition by asset classes (i.e. retail, office, residential and other properties) and as a result, various measures of the Group's business and recurring cash flows derived from rental income may change.

- Investing in new sectors on a small scale (such investments do not constitute more than 10% of the Group's assets);
- investing as a minority shareholder in investment platforms with experienced developers and financial investors;
- conducting comprehensive analyses of new sectors and markets;
- cooperating with local specialists familiar with the conditions of a given market; and
- conducting a detailed due diligence prior to making a decision on whether to proceed with a new project.

In 2024, the Group commenced operations in Germany in the residential sector by managing a portfolio of rental residential properties and developing a senior housing portfolio. However, the German economy is facing significant challenges, including a loss of competitiveness, weak demand, and

	<p>political uncertainty, which may adversely impact the performance of the Group's investments in the German market. In particular, political or economic developments may affect immigration flows and, in turn, demand for residential rental housing. In addition, the Group may encounter challenges in navigating Germany's regulatory environment, cultural differences and competitive labour market. There can be no assurance that the Group will successfully overcome these challenges or achieve the expected profitability of its investments in Germany.</p>	
<b>Risk related to changes in tenant and consumer preferences</b>	<p>Due to the change in the typical work model resulting in a significant portion of employees working in hybrid mode combining work from office with remote work, or working fully remotely (strengthened, in the case of Poland, by changes in the labour law), as well as changes in shopping preferences combined with the growing significance of online shopping instead of conventional shopping following the COVID-19 pandemic, there can be no assurance that tenants will renew their leases on terms favourable to the Group at the end of their current tenancies or, if they do not, that new tenants of equivalent standing (or any new tenants) will be acquired, which, in turn, may cause reduced or negative rental returns and profits and, as a result, could have a material adverse effect on the Group's business, financial condition and results of operations.</p>	<ul style="list-style-type: none"> <li>▪ Conducting ongoing analyses of the latest trends based on industry reports and own analyses of consumer preferences;</li> <li>▪ flexibly responding to changing consumer and tenant preferences;</li> <li>▪ attempting to secure high-quality projects that are attractive to tenants;</li> <li>▪ improving amenities for tenants and implementing tenant-friendly solutions in buildings; and</li> <li>▪ adapting the Group's strategy in accordance with the changing market trends and situation.</li> </ul>
<b>Risk related to the development process</b>	<p>The Group is exposed to risks related to development processes, including, among others, demand for office space in the relevant market, a contractor's bankruptcy, claims and legal disputes with subcontractors, delays in work, the improper quality of work, increased material, labour or other costs, which may make completion of the project uneconomical, and shortages of qualified teams of professionals. Failure in any of these may negatively affect the Group's reputation and the marketability of the completed properties. The construction of</p>	<ul style="list-style-type: none"> <li>▪ Cooperating with renowned and experienced contractors, subcontractors and suppliers;</li> <li>▪ checking the financial condition and technical capabilities of a contractor or supplier prior to signing contracts;</li> <li>▪ applying mechanisms in construction contracts protecting investors (e.g. lump sum remuneration, indemnification regarding subcontractors, obligation to provide the respective bank</li> </ul>

	<p>the Group's projects may also be delayed or otherwise negatively affected by other factors over which the Group has limited or no control, such as acts of nature, industrial accidents, deterioration of ground conditions (for example, the presence of underground water) and potential liability under environmental laws and other laws related to, for example, ground contamination, archaeological findings or unexploded ordnance, acts of terrorism, riots, strikes or social unrest, changes in applicable laws, and increases in the cost of external financing. Additionally, no assurances can be given that permits or other decisions required from various authorities in connection with existing or new development projects will be obtained by the Group in a timely manner. Such decisions may be challenged by third parties, which may result in delays in the development timetable, failing to meet deadlines and/or an investment being abandoned. The Group's land may also require rezoning or a new or the obtaining of an amended local spatial development plan or planning permission. Obtaining the required permission cannot be guaranteed, and the Group has encountered such difficulties in the past.</p>	<p>guarantees or other collateral securing the proper performance of work and guarantee periods);</p> <ul style="list-style-type: none"> <li>▪ conducting ongoing supervision over construction projects by project managers;</li> <li>▪ conducting detailed analyses of the zoning designation of land prior to acquisition;</li> <li>▪ developing experience in obtaining permits from major cities in Hungary;</li> <li>▪ cooperating with experienced external architectural and urban planning studios as well as specialists in the fields of planning and administrative procedures; and</li> <li>▪ limiting the number of new developments of the Group conducted at the same time (in light of the fact that development is not a core business operation of the Group).</li> </ul>
<p><b>Risk related to potentially insufficient capital expenditures allocated for the residential portfolio in Germany</b></p>	<p>The portfolio of residential real estate for rent in Germany bought by the Group comprises properties built from 1950 to 1969, along with newer properties built from 1970 to 1984. The Group has allocated funds for capital expenditures to carry out planned refurbishment work to bring the buildings into ESG compliance, however, the allocated amount may be insufficient to complete the planned refurbishment. The buildings may also require additional work that is not included in the technical assessments of the buildings made prior to their acquisition. Additionally, the European Union may adopt new regulations concerning mandatory refurbishment that the Group will be required to perform, the costs of which are not included in the secured capital expenditures.</p>	<ul style="list-style-type: none"> <li>▪ Extensive experience in bringing buildings into ESG compliance;</li> <li>▪ a comprehensive technical assessment of the portfolio conducted prior to any acquisitions; and</li> <li>▪ monitoring regulations concerning ESG requirements.</li> </ul>

---

**Risk of not adjusting the Group's properties to sustainability criteria and not reducing its impact on the environment**

The Group is required to adapt to adopted EU legal acts in the area of ESG, to meet multiple sustainability criteria, and to take actions aimed at reducing the environmental impact of the Group's operations. There is a risk that the adaptation of the Group's buildings to be net zero effective, as well as actions taken by the Group to improve building efficiency may require significant capital expenditures and, in some cases, could be difficult to implement. One cannot rule out that, for the purpose of the reduction of their carbon footprint, tenants will be looking for space that provides a low carbon footprint or will limit their office space or place great importance on working from home (in an effort to generate fewer or even no carbon emissions) instead of working from an office, which may lead to reduced demand for office space, and have a negative impact on the rental returns and profitability of the Group. There is a risk that buildings that do not meet sustainability criteria will not be attractive either to tenants or potential purchasers and, as a consequence, the sale of such buildings may be difficult, or the price offered for such buildings will not be satisfactory to the Group. Also, the observed changes in the climate (in particular, changes in the average air temperature in the region in which the Group operates) may require changes in the operation of the Group's properties as well as its equipment (including, for instance, upgrading air conditioners, replacing conventional lighting with LED, etc.). Moreover, making such changes may require additional capital expenditures. Failure to make these changes in a timely manner could create a competitive disadvantage and a decrease in rental revenue, and thereby negatively impact the Group's results of operations and financial condition.

- Focusing on a thorough analysis of the environmental impact of the operation of the Group's buildings;
- continuously improving the monitoring and management of buildings based on the most recognised environmental certification systems such as BREEAM or LEED;
- reducing the Group's carbon footprint primarily by ensuring the energy efficiency of buildings and investing in energy from renewable sources;
- using green energy from certified sources in all buildings in Hungary, Poland, Romania and Croatia, and partially in Bulgaria;
- publishing a comprehensive ESG report (being the first commercial developer in CEE to do so);
- supporting local communities and educational and cultural activities by working with over a hundred organisations, including NGOs, schools and universities;
- implementing a diversity and inclusion policy, employing an array of employees that vary in terms of gender, age, education, and cultural background; and
- delivering new buildings, and acquiring and managing assets with a focus on environmental protection.

## LEGAL AND REGULATORY RISKS

Risk	Description	Risk management method
<b>Risk of changes in laws and regulations</b>	<p>The Group's operations are subject to various regulations in Hungary, Serbia and other jurisdictions in which the Group conducts business activities (including fire and safety requirements, environmental regulations, labour laws and land zoning) and is exposed to the risk of changes in these legal and regulatory frameworks across these jurisdictions. New, or amendments to existing, laws, rules, regulations or ordinances could require significant unanticipated expenditures or impose additional obligations, fines, penalties and/or restrictions on the use of the Group's properties and/or its operations.</p> <p>Additionally, the EU may adopt new regulations concerning mandatory refurbishment that the Group will be required to perform, the costs of which are not included in the secured capital expenditures. Therefore, the Group's allocated capital expenditure may not be sufficient to support its the residential portfolio.</p> <p>Moreover, there can be no assurance that if perpetual usufruct fees in Poland are increased, the Group would be able to pass such costs onto its tenants in the form of increased service charges, and such increase may lead to a given property becoming less competitive as compared to properties not situated on land subject to perpetual usufruct fees.</p> <p>Furthermore, the introduction or enforcement of stricter environmental, health, and safety laws or regulations in the CEE and SEE regions, as well as Germany, could lead to substantial costs and liabilities for the Group. This may also subject the properties currently or previously owned or operated by the Group to more rigorous scrutiny than is presently the case. As a result, complying with these laws could lead to significant</p>	<ul style="list-style-type: none"> <li>▪ Ongoing monitoring of changes in laws and regulations applicable to the Group's operations (while still in the legislative process) so that new requirements can be quickly implemented in the Group's operation; and</li> <li>▪ cooperating with renowned legal advisors in the jurisdictions where the Group conducts business activities.</li> </ul>

	<p>expenses related to required removal, investigation or remediation efforts. Additionally, the presence of such substances on the Group's properties may limit its ability to sell the property or use it as collateral.</p>	
<p><b>Risk related to regulations concerning maximum increases of rent in Germany</b></p>	<p>The residential real estate for rent sector in Germany, in which the Group commenced operations, is tightly regulated, including regulations concerning the maximum increases of rent by landlords. One cannot rule out that, in light of the current political situation in Germany, further limits on rent increases or even a nationwide rent freeze may be introduced. The unpredictability of the regulator in this respect is seen as the greatest risk on the income side. It is also quite relevant that approximately 30% of the residential portfolio of the Group is rented by public entities. The regulatory cap on rent increases in housing stock would be particularly adverse in the face of rising costs (e.g. for the maintenance and repair of apartments). This, combined with the cost of financing for the acquisition of the portfolio, may result in the Group not achieving targeted investment returns, having difficulties in the disposal of a part of the portfolio at improved prices, and/or the lack of repayment of the financing within the assumed timeframe.</p> <p>A federal election in Germany was held on 23 February 2025 resulting in a newly formed federal government. No assurance can be given that further limits on rent increases or even a nationwide rent freeze will not be introduced.</p>	<ul style="list-style-type: none"> <li>▪ Ongoing monitoring of changes in German laws applicable to the Group's operations, in particular concerning the cap on rent increases;</li> <li>▪ a plan to bring buildings up to ESG standards, which in the long term should result in both increasing the attractiveness of the portfolio and decreasing the maintenance costs; and</li> <li>▪ cooperating with renowned legal advisors with respect to rental agreements and the permitted rent increases under German law.</li> </ul>
<p><b>Risk of changes in tax laws or their interpretation</b></p>	<p>Taking into account that the tax regulations in the countries in which the Group operates, are complex and subject to frequent changes, and the approaches of the various tax authorities are not uniform and consistent, the Group is exposed to the risk that tax authorities will employ a different interpretation of tax laws that apply to the Group, which may prove unfavourable for the Group. No assurance can be given that specific tax interpretations already obtained and</p>	<ul style="list-style-type: none"> <li>▪ Monitoring changes in tax law applicable to the Group's operations;</li> <li>▪ obtaining a tax interpretation in the case of any uncertainty concerning the tax treatment of a given transaction and executing the transaction in line with such interpretation;</li> <li>▪ hiring experienced accountants and financial specialists; and</li> </ul>

		<p>applied by the Group will not be changed or challenged. There is also a risk that new tax law regulations will be introduced, which may result in greater costs due to circumstances related to complying with any changed or new regulations. Moreover, in relation to the cross-border nature of the Group's business, international agreements, including double taxation treaties which apply to members of the Group, may also have an effect on the Group companies' business.</p>	<ul style="list-style-type: none"> <li>▪ cooperating with renowned legal and tax advisors.</li> </ul>
<b>Risk of legal disputes</b>		<p>The Group may face claims and may be held liable in connection with incidents occurring on its construction sites, such as accidents, injuries or fatalities of its employees, contractors or visitors to the sites. . In addition, the construction, lease and sale of properties are subject to the risk of claims for defective construction, corrective or other works and associated adverse publicity. Claims may also be brought against the Group in connection with executed transactions concerning the sale of projects (e.g. for a breach of warranties made by the Group, and/or for the existence of defects of which the Group was not aware, but of which it should have been aware when it executed the transaction). The Group may be also involved in small-scale litigation and other legal proceedings in connection with lease agreements in the case of breaches of certain obligations of the landlord set out in such agreements.</p> <p>The Group's title to investment and development properties may also be subject to challenge, and certain permits or authorisations may have been obtained in breach of applicable laws. In particular, due to the complexity and ambiguity of real estate laws and the unreliability of certain registries, it may be difficult or impossible to confirm title with certainty, and even registered titles may be contested. Moreover, permits, re-zoning approvals or other authorisations could be subsequently challenged, which may adversely affect the Group's business, financial condition and results of operations.</p>	<ul style="list-style-type: none"> <li>▪ Applying high standards in the fields of health, safety and the environment;</li> <li>▪ monitoring compliance with health, safety and environmental procedures by the Group's employees as well as contractors and their employees and subcontractors;</li> <li>▪ introducing a mechanism limiting the Group's liability in transaction documents (e.g. time limitations, monetary limitations); and</li> <li>▪ cooperating with renowned legal advisors in the case of a dispute.</li> </ul>

## RISK FACTORS RELATED TO THE GROUP'S FINANCIAL CONDITION

Risk	Description	Risk management method
<b>Risk of decline in occupancy levels</b>	Any significant decline in occupancy levels in the Group's properties, especially the loss of reputable anchor tenants, could have a material adverse effect on the ability of the Group to generate cash flows at the expected levels. There can be no assurance that the Group's tenants will renew their leases on terms favourable to the Group or for the same space size or duration at the end of their current tenancies. Higher vacancy rates would also increase the Group's overall operating costs, as the Group would have to cover the portion of service charges generated by empty properties or units. Additionally, a small portion of the lease agreements concluded by the Group in its retail portfolio provide for a cap on increases of the service charges payable by the tenant. In such cases, any increase in maintenance charges would be covered by the Group. Any such decrease in rental revenue or increase in operating costs could have a material adverse effect on the Group's business, financial condition and results of operations.	<ul style="list-style-type: none"> <li>▪ Attempting to secure high quality projects that are attractive to tenants;</li> <li>▪ strengthening the rental and marketing strategies;</li> <li>▪ building good, long-term relationships with tenants;</li> <li>▪ continuously analysing market trends and promptly adapting to changes;</li> <li>▪ improving amenities for tenants and implementing tenant-friendly solutions in buildings;</li> <li>▪ effective management of the Group's commercial properties;</li> <li>▪ experienced leasing team; and</li> <li>▪ cooperating with reputable brokers and leasing agencies.</li> </ul>
<b>Risk of not fully recovering the operating costs from tenants</b>	The Group may not be able to fully pass on all operating costs to the tenants, especially in a very competitive environment where the Group has to offer attractive conditions and terms to be able to compete with other office or retail properties or has to improve conditions offered to attract new tenants to its projects. If vacancy rates in the Group's buildings increase, the Group must cover the portion of the service charges that is related to the vacant space. Some of the lease agreements concluded by the Group provide for a cap on increases of the service charges payable by the tenant. In such cases, if the maintenance charges increase, the Group would be unable to pass on such increases to the tenants.	<ul style="list-style-type: none"> <li>▪ Effective property management focused on minimising maintenance costs without compromising the quality of services;</li> <li>▪ the vast majority of the lease agreements concluded with tenants are triple-net leases, which means all operational costs as well as property taxes are covered by the tenants; and</li> <li>▪ limited caps on service charges passed on to tenants.</li> </ul>

---

**Risk related to the valuation of the Group's properties**

The Group's income depends partially on changes in the value of assets on property markets, which are subject to fluctuations. The valuation of a property is inherently subjective and uncertain as it is based on different methodologies, forecasts and assumptions (e.g. as to expected rental values, fit-out costs, the time necessary for renting a specific property, etc.). The Group's property valuations are made based on the discounted cashflow method (DCF), using the discount rates applicable to the relevant local real estate market or, in the case of certain properties, by reference to the sale value of comparable properties, and any change in the valuation methodology used by the valuer will have an impact on the valuation of a given property and may result in gains or losses in the Group's consolidated income statement. As a result, the Group can generate significant non-cash revenue gains or losses from period to period depending on the changes in the fair values of its investment properties, regardless of whether such properties are sold. If the forecasts and assumptions on which the valuations of the projects in the Group's portfolio are based prove to be inaccurate or are subject to changes, the actual values of the projects in the Group's portfolio may differ materially from those stated in the valuation reports. Valuations based on inaccurate assumptions concerning the Group's properties and fluctuations in valuations may have a material adverse effect on the Group's business, financial condition and compliance with bank loan agreements.

- Performing valuations of the Group's properties semi-annually (as at 30 June and 31 December of each year);
- having reputable external valuers assess the properties; and
- conducting internal reviews of property valuations and, if necessary, having a certified independent appraiser confirm such valuations.

---

**Risk related to the Group's debt financing**

The Group's existing leverage and external debt financing may have material adverse consequences for the Group, including: (i) increasing its vulnerability to and reduced possibility to respond to downturns in the Group's business or generally adverse economic and industry conditions; (ii) limiting the Group's ability to obtain additional financing to fund future operations,

- Monitoring the regular repayment of debt and securing funds for such repayment;
- monitoring to ensure the proper performance of all obligations imposed on the Group and/or the companies thereof under financing documents;

	<p>capital expenditures, business opportunities, acquisitions and other general corporate purposes, which may be necessary for the Group to achieve the envisaged returns on its project, as well as increasing the cost of any future borrowings; (iii) forcing the Group to dispose of its properties in order to enable it to meet its financing obligations, including compliance with certain covenants under loan agreements; (iv) requiring the allotment of a substantial portion of the Group's cash flows from operations to the payment of the principal and the interest on its indebtedness; and (v) placing the Group at a competitive disadvantage compared to its competitors that are less leveraged.</p> <p>A potential risk of obtaining financing and/or obtaining it on favourable terms may apply to financing of several investment properties under construction. This may be due to several factors, including low pre-leasing levels during the construction process, slower sales of residential units during the construction phase. As a result, higher levels of equity may be required to be deployed for the purposes of development of new investment properties and the recycling of such equity may take longer and depend on external conditions.</p>
<p><b>Risk of the failure to meet obligations under financing agreements</b></p>	<p>The Group could fail to make the principal and/or interest payments due under the Group's loans or breach any of the covenants included in loan agreements – in some cases also due to circumstances that may be beyond the control of the Group. These may include requirements to meet certain loan-to-value ratios, debt service coverage and working capital requirements. A breach of such covenants by the Group could result in the forfeiture of its mortgaged assets, the acceleration of its payment obligations, the acceleration of payment guarantees, trigger cross-default clauses or make future borrowing difficult or impossible. In these circumstances, the Group could also be forced, in the long term, to sell</p> <ul style="list-style-type: none"> <li>▪ ensuring loan funds are spent in accordance with the purpose of a given loan;</li> <li>▪ attempting to ensure the proper liquidity of the Group; and</li> <li>▪ maintaining available credit limits and good relationships with financing banks.</li> </ul> <ul style="list-style-type: none"> <li>▪ Monitoring the regular repayment of debt and securing funds for such repayment;</li> <li>▪ employing specialists responsible for handling the existing debt financing of the Group;</li> <li>▪ ensuring that loan funds are spent in accordance with the purpose of a given loan; and</li> <li>▪ conducting monitoring to ensure the proper performance of all obligations of the Group under existing financing documents so as to prevent the occurrence of any breach and/or default.</li> </ul>

some of its assets to meet its loan obligations, or the completion of its affected projects could be delayed or curtailed.

The Group's leverage and debt service obligations are significant and may increase in the future, which could heighten its vulnerability to adverse economic conditions, limit its access to additional financing, increase borrowing costs, and require greater allocation of operating cash flows to debt service. In addition, a significant portion of the Group's debt is secured, including financing incurred for its German Residential Portfolio, where the secured assets are ringfenced and unavailable as security for future indebtedness. A breach of obligations under such debt could lead to foreclosure on secured assets and materially adversely affect the Group's ability to satisfy its obligations.

---

**Risk related to refinancing**

The Group's real estate projects are financed under secured loans and unsecured bonds that have been provided for a limited term. The Group may not be able to renew or refinance its remaining obligations in part or at all, or may have to accept less favourable terms in respect of such refinancing. The costs of new financing and/or refinancing may be significantly higher than under the existing facility agreements. If the Group is unable to renew a loan or bond or secure refinancing, the Group could be forced to sell one or more of its properties in order to procure the necessary liquidity or to use its existing cash to repay the loan. Additionally, if the Group is not able to renew certain loans or bonds, the properties that are financed by way of such loans or bonds will become low-leveraged and, as a consequence, will not be able to generate the expected returns on equity. The refinancing is also connected with a risk of changes in interest rates, which may be less favourable than under the existing indebtedness. Interest rates are highly sensitive to many factors, including government monetary policies and

- Monitoring to ensure the proper performance of all obligations of the Group under existing financing documents so as not to lead to any breach and/or default;
  - maintaining the creditworthiness of the Group at a sufficient level;
  - consolidation of cash prior to the maturity date of the bonds through the disposal of non-core assets;
  - owning significant assets that can serve as collateral for financing banks;
  - owning significant assets that can be disposed of for the purposes of partial repayment of existing debt;
  - extensive experience in obtaining financing and refinancing;
  - effectively managing the Group's leverage;
  - building good and long-term relationships with financing banks;
  - employing experienced financial specialists; and
  - limiting exposure to changes in interest rates by incurring debt at a fixed interest rate, or changing interest from a variable to a fixed rate via hedging instruments.

<b>Currency risk</b>	<p>The Group's functional currency is euro. The Group is exposed to currency risks arising, <i>inter alia</i>, from the fact that certain of the Group's costs (such as certain construction costs, labour costs and remuneration for certain general contractors) are incurred and some of the income is gained in the currencies of the geographical markets in which the Group operates, including the Hungarian forint, and the Serbian dinar. The exchange rates between local currencies and the euro have fluctuated historically. A portion of the Group's debt is denominated in currencies other than EUR and, as a result, a portion of the financial costs is incurred by the Group in such other currencies (the currency risk applies, in particular, to interest on the bonds issued by the Group in Hungarian forints).</p>	<ul style="list-style-type: none"> <li>▪ Obtaining debt financing denominated in euros or converting financing obtained in other currencies into euros using hedging derivatives;</li> <li>▪ concluding agreements with contractors specifying remuneration expressed in euros; and</li> <li>▪ engaging in other forms of currency hedging in an attempt to reduce the impact of currency fluctuations and the volatility of returns.</li> </ul>
<b>Risk of loss of liquidity by the Group</b>	<p>There is a potential risk of a loss of liquidity by the Group in the case of significant disturbance in the balance between its receivables and liabilities, and a material cash flow disruption in the absence of access to debt financing.</p>	<ul style="list-style-type: none"> <li>▪ Permanent monitoring of the forecast and actual short and long-term cash flows, as well as receivables and liabilities;</li> <li>▪ maintaining a sufficient cash level in order to ensure proper liquidity management;</li> <li>▪ maintaining free credit limits on current accounts;</li> <li>▪ experienced management of the Group; and</li> <li>▪ diversification of the Group's portfolio as well as investing in new sectors that might go through different phases of the business cycle at different times.</li> </ul>

## RISK FACTORS RELATED TO THE SHAREHOLDING STRUCTURE

Risk	Description	Risk management method
<b>Risk related to the Group's controlling shareholder</b>	<p>GTC's dominant entity is Optimum Venture Private Equity Fund ("Optima"), which indirectly holds 62.61% of the shares in the Company's share capital. Optima is controlled by Pallas Athéné Domus Meriti, a Hungarian foundation which was founded by the National Bank of Hungary.</p> <p>Optima and the foundation controlling it have recently been the subject of ongoing media reports and public commentary relating to alleged irregularities. These matters do not concern the Company, any of its group companies, or their respective employees. The Company remains an independent legal entity, not responsible for, nor guaranteeing, any obligations of its shareholders. None of the Company's assets have been pledged as collateral in relation to any liabilities of its shareholders, nor do the Company's shareholders provide any form of financing to the Company beyond their already-fulfilled equity contributions.</p> <p>While the Company is not involved in any way in these matters and operates under the oversight of the supervisory board (several of the members of which are independent), it cannot be ruled out that further developments, depending on their nature and public response, could affect the perception of the Company among certain investors, financing institutions, or business partners. This could potentially influence the Company's ability to access capital, refinance the existing debt, or pursue certain commercial opportunities.</p> <p>Moreover, the Group cannot exclude the risk of a potential conflict of interest between Optima and the remaining shareholders. When considering an investment, the business and operational matters of the Group, and/or the most appropriate uses of the Group's available</p>	<ul style="list-style-type: none"> <li>▪ Applying most of the principles of corporate governance set out in the Good Practices of Companies Listed on the WSE 2021;</li> <li>▪ protecting the rights of minority shareholders in the articles of association, including the appointment of a shareholder meeting delegate (supervisory board member appointed by the general meeting), adhering to independence criteria for at least two supervisory board members, and special approval requirements for related-party transactions; and</li> <li>▪ periodic monitoring of media reports, adhering to high standards of corporate governance, transparency, and operational independence.</li> </ul>

cash, the interests of Optima may not be aligned with the interests of the Group or of its other shareholders, especially as Optima operates in the same markets as the Group and it might compete over investments.

Although the Group's shareholders in the Annual General Meeting on 24 June 2025 upheld the recommendation from the Management Board that the Company should not distribute dividends with respect to the year ended 31 December 2024, there is no guarantee that shareholders will not require and authorise the payment of dividends in the future, as was the case for the year ended 31 December 2023 (which the Company's shareholders approved on 26 June 2024 and paid in September 2024). Any payment of dividends may affect the Group's liquidity. Optima also operates in the same markets as the Group and may compete over investments that the Group may be interested in. Any such conflicts of interest may have an adverse effect on the Group's business, financial condition and results of operations.

**Risk associated with related-party transactions**

As the Group executes transactions with related parties, it is exposed to the risk of such transactions being challenged by tax authorities, taking into account the specific nature of related-party transactions, the complexity and ambiguity of legal regulations governing the methods of determining arm's-length terms for the purpose of such transactions, as well as difficulties in identifying comparable transactions for reference purposes.

- Monitoring legal and tax regulations as well as amendments to laws governing related-party transactions;
- monitoring market practice (including the approach of the authorities) in determining arm's-length terms for the purpose of related-party transactions; and
- cooperating with experienced tax and legal advisors.

## RISK FACTOR RELATED TO THE MARKETS IN WHICH THE GROUP OPERATES

Risk	Description	Risk management method
<b>Risk associated with countries in emerging markets</b>	<p>The markets in the regions of CEE and SEE in which the Group operates are subject to greater legal, economic, fiscal and political risks than mature markets, and are subject to rapid and sometimes unpredictable changes. CEE and SEE countries still present various risks to investors, such as economic instability or changes in national or local government, land expropriation, changes in taxation legislation or regulations, changes to business practices or customs, changes to laws and regulations related to currency repatriation, and limitations on the level of foreign investment or development. In addition, adverse political or economic developments in the countries in which the Group operates and/or neighbouring countries could have a significant negative impact on, among other things, gross domestic product, foreign trade and the general economies of individual countries. The ongoing armed conflict in the territory of Ukraine and uncertainties regarding its duration and scale, and the relationship of CEE and SEE countries with Russia may affect the attitude of investors towards the regional real estate market and their willingness to invest in countries neighbouring Ukraine and Russia where the Group operates. The Group may be exposed to risks related to investing in real estate in CEE and SEE countries resulting from the unregulated or uncertain legal status of certain real properties (e.g. due to reprivatisation claims).</p>	<ul style="list-style-type: none"> <li>▪ Monitoring political and economic situations in the regional markets in which the Group operates;</li> <li>▪ hiring local specialists familiar with the conditions of a given market;</li> <li>▪ conducting a detailed due diligence review prior to making a decision on whether to proceed with a new project;</li> <li>▪ implementing legal protection measures in concluded contracts; and</li> <li>▪ securing rental income by way of the execution of long-term lease agreements.</li> </ul>
<b>Risk related to operations in a new geographical market (Germany)</b>	<p>In 2024, the Group commenced operations in Germany in the residential sector (an operating portfolio of residential real estate for rent and a portfolio of senior housing for rent that is under construction). The German economy continues to face headwinds and is experiencing</p>	<ul style="list-style-type: none"> <li>▪ Ongoing monitoring of the geopolitical situation as well as the market and macroeconomic conditions in Germany in terms of their potential impact on the Group;</li> <li>▪ satisfactory results of comprehensive analyses of new sectors on the German market conducted prior to any acquisitions;</li> </ul>

significant difficulties amid a loss of competitiveness and weak domestic and foreign demand for manufactured goods. Combined with the unstable political situation in the country, this creates uncertainty as to future political or economic decisions that may affect the Group's operations on the German market. In particular, certain political decisions as well as the economic crisis may cause an outflow of immigrants from Germany, which in turn may reduce the demand for rental housing. Such situation may result in a reduction of the Group's profit or a failure to achieve the expected level of profitability of its investments in Germany in the residential real estate for rent sector.

Furthermore, the Group may encounter additional challenges associated with the commencement of activities in an entirely new geographical market and a segment of the real estate market in which it has limited prior experience, expertise, or personnel.

Germany's demographic challenges, including an aging population, could affect demand patterns for residential rental housing and may require additional investments to maintain property attractiveness. There can be no assurance that the Group will successfully overcome all challenges associated with its expansion into Germany or any other new market it may enter in the future, which could adversely affect the Group's business, financial condition, results of operations and prospects.

- as at the date of this Report, the Group has not identified specific risks that result directly from the economic and/or political situation in Germany and that have an impact on the Group's operations, financial results or development process.

As of 30 June 2025, the book value of the Company's portfolio amounts to EUR 406,847 with: (i) the Group's completed investment properties account for 67% thereof; (ii) investment properties under construction for 25%; and (iii) an investment landbank intended for future development for 8%.

### 4.2 Main events in the six-month period ended 30 June 2025

Please see Note 5. of consolidated financial statements.

#### EVENTS AFTER 30 JUNE 2025:

In September 2025, the company's bondholders approved changes to the rules governing two bond series, GTC 2030/A and GTC 2031/A. The main change was to shorten the time allowed to fix a downgraded credit rating. For example, if the bonds slipped below a B+ rating, the company would now have 18 months to recover instead of 24. If the rating fell as low as CCC, the company would have one year to raise it back to at least B-, and another six months to lift it back to B+. This replaced the older rule that required the bonds to be redeemed within 90 days of a CCC rating.

The new terms also introduced stricter limits on how long the bonds could stay at a lower rating. Ratings below B+ could last no longer than two years, while ratings at SD or D could only remain for 30 days. If the company failed to improve the rating within these timeframes, it would have to redeem the bonds within 30 days.

**These amendments officially came into force on 29 August 2025**

#### **4.3 Structure of the Group**

The structure of GTC Hungary Real Estate Development Pltd. Capital Group as of 30 June 2025 is presented in the unaudited consolidated financial statements for the 6-month period ended 30 June 2025 in Note 4 “Investment in subsidiaries.”

There were 2 significant changes in the structure of the Group that occurred in the first half of year ended 30 June 2025: Firstly, GTC Univerzum Projekt Kft. and Kompakt Land Kft left the Group on 6 January 2025 as a result of the completion of the series of transactions leading to acquisition of the German residential portfolio from LFH Portfolio Acquico S.À R.L. and Peach Property Group AG. Secondly, Glamp d.o.o. Beograd (GTC X) building was sold with effect from 31 January 2025..

#### **4.4 The Group's Strategy**

The GTC Hungary is part of the GTC Group and as a result its strategy is aligned with the Strategy of the parent company. The GTC Group's strategy centres around stable growth, financial prudence and environmental sustainability with a commitment to create long-term value for its stakeholders.

The Group's growth should be based on GTC 's core competences, i.e. construction of new real estate assets to earn developer's profit and adding value to the standing properties via strong asset management.

Core asset classes:

- Green office buildings (both newly constructed and existing ones)
- Green shopping malls (operations only)
- Broadly understood living sector (residential for sale and rent, senior living and student housing) to be newly constructed;
- Renewable energy
- Hospitality sector

Countries to operate in:

- Existing European countries of GTC presence to remain GTC's core markets
- New strong markets with growth potential (Germany, UK)
- Highly rated countries to increase the overall rating of the Group.

**Portfolio management priorities:**

- Active management of our portfolio to improve rental income and occupancy and maintain cost efficiency
- Repositioning of old / non energy efficient assets or the ones located in challenging (especially regional) markets

- Sale of non-core assets to unlock equity for new developments and acquisitions and increase the return on invested equity
- Selective disposals of operating commercial properties that are either capex intensive or reached a peak of the book value (fully rented with high WAULT)
- Value-add acquisitions that provide tangible potential through reletting, improvement in occupancy and rental upside and realisation of redevelopment potential
- Entering asset classes and countries which offer higher returns / further growth potential meeting investment criteria adopted by the Group
- Running at any time at least one construction in each of the countries of GTC presence
- Converting ongoing development projects and land reserves into income-generating properties

**Active liabilities' management:**

- Gradual exit from bond capital markets and financing investment needs from senior bank debt
- Active management of financing cost through continuous refinancing to increase the return on equity
- While LTV shall be decreased in longer term interim increases of the ratio connected with capital markets exit or cash intensive developments in project's development early stages would be acceptable

**Sustainability measures (ESG):**

- Focus on green buildings, carbon footprint reduction, and sustainable portfolio certification to mitigate climate change
- Prioritize tenant relationships and community impact through responsible investments
- Uphold anti-corruption and anti-money laundering measures and effectively manage risks
- Actively raise employees' awareness of ESG aspects and encourage reporting of ESG-related issues
- Restrictively adhere to sanctioned countries and individuals policies
- Support initiatives in ESG area and membership on organisations which promulgate ESG ideas

**Others:**

- Further optimisation of overheads through processes' improvements and digitalisation
- Centralisation of selected functions and outsourcing of functions where competences are missing

## ESG Policy Pillars

Environmental issues, including climate issues, are an important area of the Group management. They are included in our ESG Policy which is based on 3 pillars and 8 focus areas:

### **(E) Environment: concern for the environment**

We are reducing our environmental footprint. We deliver and manage green-certified buildings (saving energy and resources, lowering carbon emissions). We contribute to a circular economy.

Focus areas of the pillar:

E.1. Green Buildings

E.2. Climate Change Mitigation

### **(S) Social: empowerment, respect and diversity**

We deliver office and retail space where our tenants can grow. We care about the employees, who are our biggest asset. We are a good neighbour, investing in local communities.

Focus areas of the pillar:

S.1. Tenants

S.2. Employees

S.3. Communities

### **(G) Governance : best governance practices**

We act ethically and assure compliance of all our operations. We implement processes minimising ESG-related risks. We lead open and honest communication with all our stakeholders.

Focus areas of the pillar:

G.1. Compliance

G.2. Risk management

G.3. Transparency

<b>Total</b>				<b>36,000</b>	

#### **4.5.1.3 Overview of investment property landbank**

Management has conducted a thorough, asset by asset, review of the whole portfolio, in parallel to its decision to focus on Group's new developments efforts, solely on the strongest markets and, whilst supporting only the projects in its portfolio, which give the strongest mid-term upside potential, while reducing. Concurrently, the Management decided to reduce the cash allocation towards projects that has a longer-term investment horizon. The above-implied re-assessment of some of GTC's landbank projects development timetable and rescheduling them to a later stage or designating them for sale.

Additionally, in some cases, in view due to the decline in consumption and deteriorating of purchasing power, the timetable for stabilization of in relevant catchment areas around certain completed and cash generating assets, the timeframe for stabilization of had to be re-assessed, and consequently expectations for stabilized income were deferred.

As of 30 June 2025, the Group had land classified as investment property landbank designated for future commercial development of EUR 33,610. The landbank, designated for future commercial development, includes projects on Group's focus for the coming years.

The Group's rich investment property landbank designated for future development allows us to extend the planned projects in areas where there will be demand for commercial properties.

## **5. OPERATING AND FINANCIAL REVIEW**

### **5.1 General factors affecting operating and financial results**

#### **GENERAL FACTORS AFFECTING OPERATING AND FINANCIAL RESULTS**

Management board believes that the following factors and important market trends have significantly affected the Group's results of operations since the end of the period covered by the latest published audited financial statements, and the Group expects that such factors and trends will continue to have a significant impact on the Group's results from operations in the future.

The key factors affecting the Group's financial and operating results are pointed below:

- the economic slowdown in CEE and SEE which may slow down the general economy in the countries where the Group operates;
- availability and cost of financing;
- impact of the supply and demand on the real estate market in CEE and SEE region;
- impact of inflation (according to Eurostat, the euro area annual inflation was 4.6% in June 2025);
- impact of interest rate movements (however, as of 30 June 2025, 100% of the Group's borrowings were either based on fixed interest rate or hedged against interest rate fluctuations, mainly through interest rate swaps and cap transactions);

- impact of foreign exchange rate movements (the vast majority of the Group's lease agreements are concluded in euro and include a clause that provides for the full indexation of the rent linked to the European Index of Consumer Prices, bonds issued in other currencies than euro were hedged against foreign exchange rate movements using cross currency SWAPs).

## 5.2 Specific factors affecting financial and operating results

In the first half of the year, the Group continued the construction of Center Point 3 office building which increase the book value of the project.

On 23 October 2024, the Group signed a sale and purchase agreement concerning the sale of Glamp d.o.o., an owner of A-class office building in Belgrade – GTC X for EUR 52.2 million and as a result building was reclassified to assets held for sale.. In January 2025 the sale was finalized.

## **5.7 Future liquidity and capital resources**

As of 30 June 2025, the Group believes that its cash balances, cash generated from disposal of properties, cash generated from leasing activities of its investment properties, and cash available under its existing and future loan facilities will fund its needs.

The Group endeavors to manage all its liabilities efficiently and is constantly reviewing its funding plans related to (i) the development and acquisition of commercial properties, (ii) debt servicing of its existing assets portfolio, and (iii) CAPEX. Such funding is sourced through available cash, operating income, and refinancing.

The Group's loans and borrowings are mainly denominated in Euro Debt in other currencies includes green bonds issued by Hungarian subsidiary in HUF (series maturing in 2030-2031), which are hedged through cross currency interest rate swaps in line with the hedging policy of the Group.

### **AVAILABILITY OF FINANCING**

Real estate development companies, including the companies of the Group, usually finance their real estate projects with proceeds from the issue of the bonds, proceeds from bank loans, loans extended by their holding companies. The availability and cost of procuring financing are of material importance to the implementation of the Group's projects and for the Group's development prospects and its ability to repay existing debt. Finally, the availability and cost of financing may impact on the Group's development dynamics and the Group's cash flow and net profit.

Traditionally, the principal sources of financing for the Group's core business included rental revenues, bank loans, proceeds from projects, proceeds from bonds issued by the Company, and proceeds from asset disposals.

The Management has prepared and analyzed the cash flow budget based on certain hypothetical defensive assumptions to assess the reasonableness of the going concern assumption given the current developments on the market. This analysis assumed certain loan repayment acceleration, negative impact on net operating income, as well as other offsetting measures, which the Management may take to mitigate the risks, including deferring the development activity and dividend pay-out.

Based on Management's analysis, the current cash liquidity of the Company, and the budget assumptions, Management concluded that there is no material uncertainty as to the Company's ability

to continue as a going concern in the foreseeable future i.e., at least in the next 12 months. Management notes that it is difficult to predict the ultimate short, medium, and long-term impact of the macroeconomic conditions on the financial markets and the Company's activities, but the expected impact may be significant. Accordingly, Management conclusions will be updated and may change from time to time.

("GTC Poland", "GTC SA"), a company listed on the Warsaw Stock Exchange (WSE) and inward listed on Johannesburg Stock Exchange (JSE). The majority shareholder of the GTC SA is Optimum Ventures Private Equity Funds, though GTC Dutch Holdings B.V. ("GTC Dutch") and GTC Holding Zrt. The ultimate controlling party of the Group is Pallas Athéné Domus Meriti Foundation.

### **2. BASIS OF PREPARATION**

The interim condensed consolidated financial statements for the six month ended June 30, 2025 have been prepared in accordance with IAS 34 Interim Financial Reporting as adopted by EU.

At the date of authorization of the interim condensed consolidated financial statements, considering the EU's ongoing process of IFRS endorsement and the nature of the Group's activities, there is no significant difference between International Financial Reporting Standards applying to these consolidated financial statements and International Financial Reporting Standards endorsed by the European Union. The new standards which have been issued but are not effective yet in the financial year beginning on 1 January 2023 have been presented in the Group's consolidated financial statements for the year ended 31 December 2022 (Note 6).

The interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Group's annual consolidated financial statements as of December 31, 2024. The interim financial results are not necessarily indicative of the full year's results.

The functional currency of the Company and most of its subsidiaries is euro, as the Group primarily generates and spends cash in euro: 1) prices (rental income) are denominated in euro; 2) all borrowings are denominated in euro or hedged to euro through swap instruments. The functional currency of some of entities in the Group is other than euro.

The financial statements of those companies prepared in their functional currencies are included in the consolidated financial statements by translation into euro using appropriate exchange rates outlined in IAS 21. Assets and liabilities are translated at the period end exchange rate, while income and expenses are translated at average exchange rates for the period. All resulting exchange differences are classified in equity as "Foreign currency translation reserve" without affecting earnings for the period.

As of 30 June 2025, the Group's net working capital (defined as current assets less current liabilities) was positive and amounted to EUR 4,898.

The management has analyzed cash on hand and timing, nature and scale of potential financing needs of particular subsidiaries and believes that there are no risks for paying current financial liabilities as well as expected operating cash-flows will be sufficient to fund the Group's anticipated cash requirements for working capital purposes for at least the next twelve months from the date of the financial statements. Consequently, the interim condensed consolidated financial statements have been prepared on the assumption that the Group companies will continue as a going concern in the foreseeable future, for at least twelve months from the date of the interim condensed consolidated financial statements.

There were no changes in significant accounting estimates and management's judgements during the period.

**3. NEW STANDARDS, INTERPRETATIONS AND AMENDMENTS ADOPTED BY THE GROUP**

The accounting policies adopted in the preparation of the Condensed Consolidated Interim Financial Statements are consistent.

Other standards issued but not effective are not expected to impact on the Group's financial statements.

The Group's assessment is that the above changes have no material impact on the Condensed Consolidated Interim Financial Statements.

The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective. No changes to comparative data or error corrections were made.

**4. INVESTMENTS IN SUBSIDIARIES**

The consolidated financial statements include the financial statements of the Company, and its subsidiaries (the 'Group') listed below together with direct and indirect ownership of these entities and voting rights proportion as at the end of each period. ### **5. EVENTS IN THE PERIOD**

On 06 January 2025 changes in the Group structure took place resulting from the completion of the series of transactions leading to acquisition of the German residential portfolio from LFH Portfolio Acquico S.À R.L. and Peach Property Group AG. This required changes in the group structure resulting in a disposal of GTC Univerzum Projekt Kft. and Kompakt Land Kft.

On 31 January 2025, the Group finalized the sale of the entire share capital of Serbian subsidiary Glamp d.o.o. Beograd (Project X) for EUR 22.7 million (net of cash and deposits in sold entity) which was close to the amount of assets held for sale deducted by the amount of liabilities related to those assets presented in the annual consolidated financial statements for 2024. The amount was settled in full during reporting period. Transaction was not concluded with any related party.

### **6. IN AUGUST 2025, GTC HUNGARY CHANGED ITS LEADERSHIP. ZSOLT FARKAS AND BALÁZS GOSZTONYI LEFT THE BOARD, AND MAŁGORZATA AGATA CZAPLICKA BECAME THE NEW CHIEF EXECUTIVE OFFICER, TAKING ON THE ROLE AS THE SOLE EXECUTIVE OFFICER FOR AN INDEFINITE TERM. THE CHANGES TOOK EFFECT ON 7 AUGUST..SEGMENTAL ANALYSIS**

Financial data prepared for the purposes of management reporting, on which segment reporting is based, is based on the same accounting principles that are used in the preparation of the consolidated financial statements of the Group.

The operating segments are aggregated into reportable segments, taking into consideration the nature of the business, operating markets, and other factors. Operating segments are divided into geographical zones, which have common characteristics and reflect the nature of management reporting structure: Hungary and Serbia. The Group has operations in office segment only.

### 11. DERIVATIVES

The Group holds instruments (IRS, CAP, currency SWAP and cross-currency interest rate SWAP) that hedge the risk involved in fluctuations of interest rate and currencies exchange rates. The instruments hedge interest on loans and bonds for periods of 2-9 years.

Derivatives are presented in financial statements as below:

	30 June 2025 (unaudited)	31 December 2024 (audited)
Non-current assets	-	166
Current assets	356	499
Non-current liabilities	(26,885)	(34,161)

Change of non-controlling interest	(406)	-
<b>Cash flow hedge reserve as of the end of the period</b>	<b>(10,965)</b>	<b>(13,344)</b>

Derivatives are measured at fair value at each reporting date. Valuations of hedging derivatives are considered as Level 2 fair value measurements. Fair value of derivatives is measured using cash flows models based on the data from publicly available sources.

The Group applies cash flow hedge accounting and uses derivatives as hedging instruments. The Group uses both qualitative and quantitative methods for assessing effectiveness of the hedge. All derivatives are measured at fair value effective part is included in other comprehensive income and reclassified to profit or loss when hedged item affects profit or loss. The Group uses IRS and Cap for hedging interest rate risk on loans, and cross-currency interest rate swaps for hedging both interest rate risk and currency risk on bonds denominated in foreign currencies.

### **12. CASH AND CASH EQUIVALENTS**

Cash balance consists of cash in banks and cash on hand. Cash at banks earn interest at floating rates based on periodical bank deposit rates. Except for minor amounts, all cash is deposited in banks.

All cash and cash equivalents are available for use by the Group. Group cooperates mainly with banks with investment ranking above B.

As securities for the bank loans, the banks have mortgages over the assets and security deposits together with assignment of the associated receivables and insurance rights. In its financing agreements with banks, the Group undertakes to comply with certain financial covenants that are listed in those agreements. The main covenants are: maintaining Loan-to-Value ('LTV') and Debt Service Coverage ('DSCR') ratios in the subsidiary that holds the project. As at 30 June 2025, the Group continues to comply with the financial covenants set out in their loan agreements and bonds' terms and conditions.

In addition, substantially all investment properties and IPUC that were financed by a lender have been pledged to secure the long-term loans from banks. Fair value of the pledged assets exceeds the carrying value of the related loans.

Green Bonds (series maturing in 2030-2031) are denominated in HUF. The initial fair value differed from the transaction price. The Group presents the difference as part of the amortized cost of the bonds under "Non-current liabilities" in the statement of the financial position.

### **14. LONG TERM BORROWINGS (CONTINUED)**

Repayments of long-term debt and interest are scheduled as follows (the amounts are not discounted):

	<b>30 June 2025 (unaudited)</b>	<b>31 December 2024 (audited)</b>
